See page 2 for the complete Digital Elite Series helmet lineup including this new design.

Four arc sensors and four modes: weld, cut, grind and X-Mode. X-Mode prevents sunlight from darkening the lens before welding starts and low-amperage lens opening from obstructed sensors.

Headgear provides extensive adjustability settings and a pivoting top for better fit and comfort.

Digital controls easily allow welder to adjust shade, delay and sensitivity.

Auto-on/off power control triggers lens at the strike of an arc.

Meets ANSI Z87.1+, CSA (Cat®–CE, AS NZ) standards.

Auto-darkening lens is warranted for three years, parts and labor.
